

What is NOAA Weather Radio?

NOAA Weather Radio (NWR) is a nationwide network of radio stations broadcasting continuous weather information direct from a nearby National Weather Service office. NWR broadcasts National Weather Service warnings, watches, forecasts and other hazard information 24 hours a day.

Working with the Federal Communication Commission (FCC) Emergency Alert System (EAS), NWR is an "all hazards" radio network, making it your single source for comprehensive weather and emergency information. NWR also broadcasts warning and post-event information for all types of hazards--both natural (such as earthquakes and volcano activity) and environmental (such as chemical releases or oil spills).

Known as the "Voice of NOAA's National Weather Service," NWR is provided as a public service by the National Oceanic & Atmospheric Administration (NOAA.) NOAA is part of the US Department of Commerce. NWR includes more than 900 transmitters, covering all 50 states, adjacent coastal waters, Puerto Rico, the U.S. Virgin Islands, and the U.S. Pacific Territories.

In Canada, a similar system (Weatheradio Canada) is in place that uses many of the same broadcast frequencies (along with others in the AM and FM commercial broadcast band) and the same coding system for alerts.

A weather radio receiver is not just for emergencies. It is a dependable, round-the-clock source of weather information to help plan daily activities.

Weather radio receivers should be standard equipment in: Hospitals, Schools, Marinas, Dispatch Offices, Manufacturing plants, Campgrounds, and of course, Homes.

Think of a weather radio receiver as one of those appliances that no home, office, or building should be without.

What is SWARA?

The Sullivan Weather Amateur Radio Association (SWARA) is a volunteer organization that works within Milwaukee/Sullivan Weather Forecast Office of the National Weather Service (NWS.)

SWARA team members volunteer their time to provide communications and other appropriate support functions within the NWS Milwaukee/Sullivan Forecast Office in conjunction with other local disaster service agencies.

SWARA is self funded. Although we work within and support a local office of a government agency, we receive limited financial support from that agency. In this regard, we offer these radios for sale as a means of funding our programs in support of the NWS Milwaukee/Sullivan Weather Forecast Office.

Are you interested in working with us? SWARA is always looking for people willing to help others.

If you would like additional information on our team and its role in support of the NWS Milwaukee/Sullivan Weather Forecast Office, please contact us at:

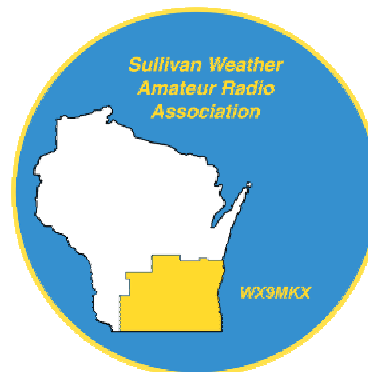

SWARA
